

Summary of the two Integrated Care Strategies of Hampshire and Isle of Wight Integrated Care System and Frimley Integrated Care System

Ros Hartley – Director of Partnerships, Hampshire and Isle of Wight Integrated Care System
Sam Burrows – Chief Transformation & Digital Officer, Frimley Integrated Care System

7 December 2023

What is an Integrated Care System?

NHS England defines an integrated care system as “**partnerships of organisations that come together to plan and deliver joined up health and care services, and to improve the lives of people who live and work in their area**” ([NHS England » What are integrated care systems?](#)). The Health and Care Act 2022 established **42 Integrated Care Systems** across England.

- Each Integrated Care System contains two statutory elements:
 - the **Integrated Care Partnership**, responsible for setting our integrated care strategy; and
 - an **Integrated Care Board**, responsible for a number of functions around healthcare service delivery including planning, resource allocation, quality and transformation.
- The Hampshire and Isle of Wight Integrated Care System is made up of four places: Hampshire, Southampton, Portsmouth and Isle of Wight, each of which has a Health and Wellbeing Board and a partnership board.
- Frimley Integrated Care System is made up of five places: North East Hampshire and Farnham, the Royal Borough of Windsor and Maidenhead, Bracknell, Slough and Surrey Health.
- All system partners with the Integrated Care System have a key role in setting the conditions for the system to thrive and succeed, for the benefit of all the people living within the area served by the Integrated Care System.

Though Hampshire is served by two Integrated Care Systems, the priorities and approaches are similar in their aim of benefitting the health and wellbeing of people living in Hampshire.

Strategic Priorities

Frimley Health and Care Integrated Care System

Six strategic ambitions to deliver two flagship objectives:

- Reduce health inequalities for our population
- Increase healthy life expectancy

Hampshire and Isle of Wight Integrated Care System

Children and Young People (CYP)	Secure the best possible outcomes for all children as they approach early years
Mental Wellbeing	Work towards zero deaths by suicide in Hampshire and Isle of Wight
	Reduction in inequalities in outcomes for CVD and Cancer for those who have experienced childhood adversity
Prevention Good Health and Proactive care	Everyone in Hampshire and Isle of Wight has a place to connect
	Reduction in preventable deaths from CVD including smoke free by 2030
Our People (workforce)	Develop integrated workforce planning
Digital and Data	Improve how we share information and improve digital skills

Our Approach

Frimley Health and Care Partnership

In the Frimley Health and Care Integrated Care System we have:

- Co-designed with partners an “assembly” approach to the formation and delivery of the Integrated Care Partnership
- Prioritised the effectiveness of our joint work and relationships with the three Public Health functions in the Frimley geography
- Held focused leadership development time to consider and develop the Frimley leadership vision and values
- Committed to the importance of the Health and Wellbeing Board construct, of which there are five in the Frimley geography, including placing health intelligence (i.e. JSNAs) at the heart of our approach

Hampshire and Isle of Wight Integrated Care System

- The Hampshire and Isle of Wight Integrated Care Partnership has developed a vision: “Happier, safer, healthier. Together.”
- The joint committee sets the strategic focus for the Integrated Care System, ensuring the Integrated Care System adds value to place, modelling system behaviours and developing and a learning and sharing culture and maximising the collective use of resources to enable the delivery of the strategy
- The joint committee acts as the steering committee for the Integrated Care Partnership and sets the strategic direction for the system
- The assembly is a forum for bringing together all the different partners across the system to creatively problem solve some of the challenges of working together
- The partnership has also developed a set of ambitions, outcomes and strategic actions which fall under each of the priority areas
- An Integrated Care Partnership Steering Group meets monthly to ensure joint planning and avoid duplication

What has been achieved?

Frimley Health and Care Partnership

Since July 2022 we have:

- Established the Integrated Care Partnership, an assembly of c.85 attendees from a broad range of statutory and VCSE partners across the Frimley geography
- Published our refreshed strategy, *Creating Healthier Communities* which sets out our shared objectives and strategic ambitions
- Held focused leadership development time to consider and develop the Frimley leadership vision and values
- Created a mandate for the local NHS to publish a *Joint Forward Plan* which makes clear how some of this work will be progressed

Hampshire and Isle of Wight Integrated Care System

- Three assemblies have been held, the last one held in September focused on mental wellbeing with over 100 people attending
- Programme boards have been established and strategic leads identified
- Work has already mobilised (e.g. joint work to promote the suicide prevention training across partners which resulted in a significant uptake of the training)
- The development of the voluntary sector voice Hampshire and Isle of Wight VCSE Health and Care Alliance (HIVCA) has progressed with appointments made to the leadership committee

Next Steps

Frimley Health and Care Partnership

Our next steps include:

- Working on the design and function of the “ICP 2.0” – co-developed in partnership with Directors of Public Health, broader local authority partners and the Integrated Care Board working together
- Ensuring we have clarity on measuring delivery progress with our *Creating Healthier Communities* strategy
- Forward planning an exciting programme of sessions for 2024 which places our founding motto – *Learn, Deliberate, Decide* – at the core of our approach to partnership working

Hampshire and Isle of Wight Integrated Care System

- The outcomes measures for each priority will be co-designed and confirmed by the New Year
- The Integrated Care Partnership will collaborate on communicating a clear message to Hampshire and Isle of Wight residents about keeping well this winter
- An assembly focussing on the social connectedness strategic priority will be held in February 2024
- HIVCA will develop a memorandum of understanding which will be submitted to the joint committee in the New Year
- The programmes will provide an update on their activities and outcomes at the joint committee in March 2024
