1. The decision:

1.1 It is recommended that Cabinet:

- a) Note and endorse the reaffirmed Adults' Health and Care Vision which is focused on maximising independence and people living long, healthy, and happier lives.
- b) Acknowledge and approve the accompanying refreshed five-year Strategy which focuses on prevention, independent living at home and facilitating or directly enabling accommodation solutions, and a Strategy that complements Hampshire 2050 and the current corporate objectives for the Council.
- c) Endorse the target achievements that the Strategy is aiming to deliver on, but noting the context in which the Directorate is working and the extreme challenges in regards service demand, workforce, finance and the dependencies and required contributions from partners, providers, and the VCSE, as well as other parts of the County Council.
- d) Note the development and importance of other related documents that together form a suite of significant Directorate publications that will guide and influence our future actions and activities to support our population, work with partners and provide guidance to our providers e.g. service specific Market Position Statements (MPSs).

2. Reasons for the decision:

2.1 The purpose of this report is to seek Cabinet approval to the refreshed 5-year strategy for Adults' Health and Care that links to a reaffirmed Vision that is focused on maximising people's independence and their quality of life.

2.2 The report outlines the current operating context for the Directorate and headlines a range of challenges that the Strategy needs to cover off/contend with, including service demand, complexity of conditions, workforce, partner and provider issues and the significant financial funding pressures.

2.3 The refreshed Strategy, which is broken down into three themed areas, confirms any number of ambitions to be pursued and delivered on over the next 5-year period, recognising the importance of prevention and demand management, but also transformation of services and the relentless operational pursuit of effective strengths-based practice as the main ways in which overall demand and demand for paid for services can best be contained.
