Purpose of this Report

1. The purpose of this report is to record formally RHHA patrol operations and inform the Duty Holder of significant events and trends having a bearing on the Marine Safety Management System.

Recommendation

2. It is recommended that the River Hamble Harbour Board supports the contents of this report.

Executive Summary

3. This report summarises the incidents and events which have taken place in the Harbour and addresses any issues currently under consideration by the Harbour Master.

Contextual Information

Patrols

4. The Harbour has been patrolled by the Duty Harbour Master at various times between 0700 and 2230 daily. Mooring and pontoon checks have been conducted daily throughout the period.

Issues

5. **Annual Trinity House Audit** – An officer of Trinity House conducted the routine annual visual audit of Aids to Navigation on 7 March to confirm compliance with the River Hamble Harbour Authority's status as a Local Lighthouse Authority. The written report highlights two known and reported defects resulting from damage incurred during Storm Eunice. Both Harbour Authority Aids are expected to be re-commissioned by the date of the Board meeting. A verbal update will be given. The report is at Annex A.
6. **2022 Annual Forum** – This year's Annual Forum and draw for tender billets will take place in the Victory Hall Warsash at 1830 on Tuesday 29 March.
7. **Resilience over the Recent Storm Period** - Infrastructure resilience to three named storms, Dudley, Eunice and Franklin over a four day period was satisfactory. A small yacht, overwhelmed by wave action, sank on her drying mooring but has since been re-floated. There was no environmental impact.

Climate Change and Carbon Mitigation Impact Assessment

8. Hampshire County Council utilises two decision-making tools to assess the carbon emissions and resilience impacts of its projects and decisions. These tools provide a clear, robust, and transparent way of assessing how projects, policies and initiatives contribute towards the County Council's climate change targets of being carbon neutral and resilient to the impacts of a 2°C temperature rise by 2050. This process ensures that climate change considerations are built into everything the Authority does.

Climate Change Adaptation. A full assessment of climate change vulnerability was not completed as no decision is required in respect of this report.

Carbon Mitigation. A full assessment of carbon mitigation vulnerability was not completed as no decision is required in respect of this report.
